

Unix

Unix/Linux flavors differ.
Branches: BSD, System V

Startup:

- 1) rc, rc.local. few files.
- 2) multiple /etc directories: rc1.d, rc3.d
One for each run level. Each with files:
S01ip, S02mail, S03innd
When switching to run-level, run these file in order

When leaving the run-level run these in order:
K01ip, K02innd

Usually links to /etc/init.d

Devices:

- 1) /dev/sda3
- 2) /dev/dsk/c0t2d0s0: controller, which target (SCSI ID),
which device, which section.

Log files:

- 1) /var/log (user does not have files that grow)
- 2) /usr/adm

System programs:

- 1) /usr/sbin, /sbin
- 2) /usr/etc

Additional programs:

- 1) /bin
- 2) /usr/share/bin
